

DIBYENDU NAYAK

React Frontend developer |  Kolkata , West Bengal |  +91- 7074074395

 dipnayak99@gmail.com |  [Dibyendu Nayak](#) |  [MeczBoyOP](#) |  [Dibyendu _portfolio](#)

PROFESSIONAL SUMMARY

Aspiring Full Stack Developer with 1+ years of hands-on experience building scalable, high-performance web and mobile applications using React.js, React Native, and JavaScript (ES6+). Strong frontend expertise in component architecture, REST API integration, performance optimization, and secure authentication (JWT Auth). Currently expanding into backend development with Node.js, Express.js, and MongoDB to build end-to-end full stack applications. Passionate about bridging frontend and backend to deliver complete, production-ready products. Experienced collaborating in Agile teams with Git-based workflows deployment.

TECHNICAL SKILLS

- **Programming Languages:** JavaScript (ES6+), HTML5, CSS3.
- **Frontend:** React.js, React Native, Tailwind CSS.
- **Backend:** Node.js, Express.js, REST API Development.
- **Databases:** MongoDB.
- **State Management:** Context API, TanStack Query (React Query).
- **API Integration & Authentication:** Axios, Fetch API, JWT Authentication.
- **Performance Optimization:** React.memo, useMemo, useCallback, Code Splitting, Lazy Loading.
- **Tools & Version Control:** Git, GitHub, Vite, Expo.
- **Deployment:** Vercel, Netlify,Render.
- **Core Concepts:** Virtual DOM, Component Lifecycle, Reconciliation, Event Loop, Responsive Design, Cross-Browser Compatibility.

PROFESSIONAL EXPERIENCE

 **SB Infowaves**

FEB 2025 – Current

React Frontend Developer

Kolkata,West Bengal , India

- Engineered 15+ reusable and modular React.js components, reducing development time by 25% and improving code maintainability across the codebase.
- Integrated 10+ REST APIs using Axios and Fetch API with centralized error handling and TanStack Query caching, decreasing redundant API calls by 18% and improving load performance.
- Implemented secure JWT-based authentication flows with protected routing, enforcing role-based access control (RBAC) across multiple application modules.
- Applied React performance optimization techniques including React.memo, useMemo, and useCallback, significantly reducing unnecessary re-renders in data-heavy components.
- Collaborated with backend engineers in an Agile team to define scalable RESTful API contracts, improving data handling efficiency and response parsing.
- Diagnosed and resolved critical rendering bottlenecks through state architecture refactoring, improving Time-to-Interactive (TTI) across key application pages.

PROJECTS

Full Stack Projects

 **MCloud** (Full-Stack File Storage System) 

Technologies: React 19, Node.js, Express, MongoDB, Tailwind CSS v4, React Query, JWT, Multer, Resend/Nodemailer, Zod.

- Architected and developed a full-stack cloud storage application featuring an interactive file explorer, soft-delete (Trash) system, and file favoriting (Starred).
- Implemented robust file management including secure uploads, downloads, and recursive folder copying/moving operations handled efficiently on the backend.
- Engineered a secure sharing system allowing users to share files and folders with optional PIN protection and auto-generated QR codes for easy access.
- Built a comprehensive Admin Dashboard providing real-time system metrics, user management (role updates, status control), and file oversight.
- Enforced enterprise-grade security by implementing JWT-based session management, password hashing with bcrypt, API rate limiting, and email OTP verification for user registration.
- Optimized frontend state using React Query for seamless data fetching, caching, and background synchronization, resulting in a smooth user experience.

Frontend Projects

 **Customer Journey** (Projects Management System)

Technologies: React 19, Tailwind CSS v4, React Query, Yup.

- Developed a multi-role dashboard (Admin / Account Manager) with dynamic permission-based UI rendering, supporting distinct workflows per user role.
- Built advanced filtering, full-text search, and server-side pagination for large datasets, ensuring smooth performance at scale.
- Created a library of reusable table and data visualization components, accelerating feature delivery across the platform.
- Implemented robust loading, error, and empty-state handling for consistent production-level user experience across all data fetch scenarios.

EDUCATION

Birbhum Institute of Engineering & Technology

August 2017 – June 2021

Bachelor of Technology in Mechanical Engineering

Birbhum , West Bengal

CGPA – 8.85

Certificates & Achievements

- **Certified in Full stack development (MERN) – PW Skills :**
HTML, CSS, JavaScript, Tailwind CSS, Node.js .

KEY COMPETENCIES

- Full Stack Development • React.js Development • Node.js & Express.js • MongoDB • JavaScript Engineering • State Management • Performance Optimization • Authentication & Authorization • Responsive Web Design • React Native • Cross-Functional Collaboration • Debugging & Troubleshooting
